

# We are the leading UK-wide charity saving and changing children's lives through medical research.

Around 60,000 babies are born prematurely every year in the UK, yet we still don't know what causes it or how to prevent it happening.

We want to make a difference in:

- tackling premature birth and treating sick and vulnerable babies
- helping children affected by disability, disabling conditions and infections
- targeting rare diseases that together severely affect many forgotten children.

**Fight for  
little lives**

Join our fight for little lives today and help sick and disabled babies and children.
